

Introduction

This document describes the work structure of the team members in the final project of CS520 comprising a comparative study of the tools NeptuneAI and WanDB.

Repository

The below link is the repository of the final project.

Repo: <https://github.com/somyagoel1311/520-final-project>

Programming pair details

The study involved two pairs, with each pair being assigned responsibility for one of the tools being compared. The pairs conducted individual investigations into their respective tools, gathering and analyzing data on various aspects. Subsequently, the findings from each tool were compiled, and a comprehensive group comparison of the results was performed.

Git hub Username: Madhusamhitha,

Programming pair: Sushrita Yerra, Madhu Samhitha Vangara

Tool: wandb

Git hub Username: somyagoel1311

Programming pair: Somya Goel, Mahima Choudha

Tool: NeptuneAI
